EDUCATION

Software Engineering Technician (Post-secondary diploma / 2 year program) Sep 2020 – Dec 2021
Centennial College, Toronto, ON (GPA: 4.0/4.5)

- Created projects using JavaScript framework and library such as Angular.js, React.js, and Express.js
- Designed different purposes of web applications by HTML, CSS, JSON, JavaScript, jQuery, and .Net Core.
- Experienced Advanced Database Concepts using Oracle 12c SQL and PL/SQL
- Created projects using Java FX and JDBC

INDEPENDENT PROJECTS

Travel Advisor App Aug 2021 - Present

- Integrated with Google maps API
- The application will recommend restaurants, attractions, etc. based on where the user is
- The application will be displaying the ratings and reviews.

Chat App Project - [GitHub Repository](#) Jan 2021 – April 2021

- Implemented axios to get an API
- Users can have a real-time based chat
- The chat engine lets users know whether the other users are online and whether they have checked messages.

Employee Management System – [GitHub Repository](#) April 2021 – May 2021

- Created user Login View, a Business Contacts List View and an Update View.
- Created application database that will contain a user collection and made authentication for registration.
- Created CRUD function that will allow users to add, update, and delete employee data.
- Implemented the get('/add') router that renders the book details page
- Implemented the post('/add') router that processes the insertion of a new book
